Profile

Final-year Computer Science Engineering student with experience developing full-stack, Android, AI, and Computer Vision applications. Proficient in Java, Python, backend development, and modern software engineering, with a strong interest in building scalable, user-centric solutions.

Education

B.Tech in Computer Science & Engineering 2023 – Present
Dayananda Sagar University, Bangalore
CGPA: 7.61/10

Pre-University (PCMC) 2021 – 2023
Poornaprajna PU College, Udupi
Percentage: 90.83%

Secondary School (SSLC) 2021
St. Michael's Convent High School, Karwar
Percentage: 88.64%

Experience & Activities

Public Relations & Operations — Centre for Performing Arts 2023 – Present
• Coordinated communications, marketing initiatives, and operational logistics for institutional cultural events.

Hackverse – SkillBridge — DSATM 2025
• Developed a full-stack platform connecting students with mentors, courses, and internship opportunities during a 36-hour hackathon.

Triwizard Hunt CTF — DSU 2025
• Solved cybersecurity challenges involving web security, cryptography, reverse engineering, and digital forensics.

Projects

Ritual – Intelligent Skincare Assistant App [🐙 GitHub](#)
• Developed an Android skincare assistant leveraging Google ML Kit and Computer Vision to analyze facial skin concerns and generate personalized skincare recommendations.

Tech: Kotlin, Java, Jetpack Compose, CameraX, Google ML Kit, DataStore

Nyishi–English Generative Translation System [🐙 GitHub](#)
• Developed a transformer-based translation system for the low-resource Nyishi language using a custom bilingual dataset and NLP techniques.

Tech: Python, Hugging Face Transformers, FLAN-T5, PyTorch, Pandas, NLP

Inner Circle – Mental Health & Wellbeing Platform [🐙 GitHub](#)
• Developed a human-AI mental health platform featuring an AI chatbot in collaboration with the Psychiatry Department at CDSIMER for student wellbeing.

Tech: JavaScript, React.js, Node.js, Express.js, MongoDB

Next Inline – Student Resource Exchange Platform [🐙 GitHub](#)
• Developed a MERN-based platform for exchanging dormitory essentials and academic resources within student communities.

Tech: MongoDB, Express.js, React.js, Node.js

Technical Skills

Languages	Java, Python, Kotlin, JavaScript, C++, C
Frameworks	React.js, Node.js, Express.js, Jetpack Compose
Databases	MongoDB, SQL
Tools	Git, GitHub, Linux, Android Studio, VS Code

Certifications

MathWorks

Computer Vision Onramp | Object Detection with Deep Learning | Machine Learning Techniques in MATLAB

Infosys Springboard

Core Java Programming | Java Functional Data Processing | Java Web Services | Network Fundamentals
